EXPERIENCE

Omio, Berlin, Germany — *Software Engineer*

11.2018 - PRESENT

Working in the acquisition tribe where our main goal is to get more users in the platform and convert them into customers by providing the best experience tailored to their intent.

Highlights:

- Created new components tailored to the user intent for the landing pages;
- Developed an MVP of the AMP project to speed-up the landing pages;
- Worked on performance metrics and checks to optimize the landing pages' speed KPIs;
- Acted as the technical leadership on some projects and mentored junior developers.

QuintoAndar, São Paulo, Brazil — *Software Engineer*

11.2017 - 10.2018

Worked in the real estate agents' support squad developing a new PWA to enable them to organize their daily activities.

Highlights:

- Developed a new PWA for the real estate agents;
- Created and maintained performance budgets for the app;
- Integrated this new product with internal UI libraries;
- Developed the back-end for this project in Node.js + TypeScript storing data in Google Firestore;
- Developed jobs using Airflow to consume messages from Apache Kafka and Google PubSub.

AMARO, São Paulo, Brasil — *Lead Front-end Developer*

07.2016 - 10.2017

Led the development of the new front-end application for the e-commerce platform which included a new design, new features and optimizations focused on performance and SEO improvements.

SKILLS

Front-end Development

- HTML, CSS, JavaScript, React, Redux, Webpack, TypeScript

Back-end Development

- Node.js, Express, Nest.js, GraphQL, MySQL, Apache Kafka, Google Cloud (Firebase, Firestore, PubSub, Cloud Functions)

Soft skills

- Ownership, hands-on, eager to learn, self-motivated, project management, agile, leadership

LANGUAGES

Portuguese: Native Speaker

English: Professional fluency

Spanish: Limited conversational skills (B1)

German: Limited conversational skills (A1)

Highlights:

- Led the development of the new front-end application using a new tech stack
- Refined and delivered new functionality to the customers
- Organized the front-end team tasks in an agile way

AMARO, São Paulo, Brasil — *Front-end Developer*

07.2014 - 06.2016

Develop and maintain the front-end for the e-commerce application, gather requirements, build layouts, optimize the performance and SEO rankings.

Highlights:

- Joined the company as employee #30
- Built the entire front-end application for the in-house e-commerce platform
- Created an internal UI library to be used across all the front-end apps

EDUCATION

UNIVAP, Brasil — *Bachelor's in Computer Engineering*

GRADUATED IN 2014

PROJECTS

FEMUG-VP (Front-end meetup group) — *Co-founder*

I helped to organize the Front-End developers' community in Vale do Paraíba. Contacted BrazilJS, to open a new group in the region and merged the idea with other professionals with an existing group.

Highlights:

- We organize monthly meetups to talk about front-end development, resources, workflow, techniques and everything between these topics.

VOLUNTEERING

Taubaté Big Donkeys — *Founder, 2010 - 2015*

Taubaté Big Donkeys is a non-profit sports organization based in Taubaté, São Paulo. The organization has an adult male flag-football team which plays the state championship in two modalities: 5x5 and 8x8. It had a junior and a female team during 2011-2013. It is always organizing events to help other NPO in the city and increase awareness about football. During my tenure there I served as the president of the organization and also as the head coach of the team.
